ABSTRACTED-PUB-NO: US20020039584A

BASIC-ABSTRACT:

NOVELTY - Formulation comprising at least 1 fusion protein that does not contain any papilloma virus (PV) non-specific epitopes and optional suitable additives and/or auxiliary agents, is new.

DETAILED DESCRIPTION - The papilloma virus non-specific epitope free formulation comprises:

(1) at least 1 fusion protein comprising at least 1 L1-protein and at least 1 E-protein from at least 1 PV; and

(2) optional suitable additives and/or auxiliary agents

An INDEPENDENT CLAIM is also included for a method for producing a formulation as above comprising, cultivating a cell containing an expression vector that encodes the fusion protein, isolating the expression product and if adding necessary suitable additives and auxiliary agents.

ACTIVITY - Cytostatic; antiviral.

MECHANISM OF ACTION - Vaccine.

USE - The formula is useful for the prevention or treatment of HPV-specific tumors, especially larynx, cervix, penis, vulva or anal carcinomas.

ABSTRACTED-PUB-NO:

WO 9948518A

EQUIVALENT-ABSTRACTS:
